A & J Joinery Ltd. Arch 9, 42 Munster Road, London, SW6 4EW.

A&J Joinery Ltd is a family run business

with a wealth of knowledge and expertise. Our team offers an experienced approach and has the skill and precision to complete your project to a high standard.

We have gained a reputation for producing high quality products as well as excellent customer service. A significant number of our customers are either through referral or returning satisfied customers.

With workshops in the heart of Fulham, and Hounslow we work on both large projects and with private clients throughout London.

As a bespoke joinery service, we have a highly trained and competent team specialising in Double Glazed Windows, Traditional Sash windows, Staircases, Doors and Conservatories.

Our products are manufactured locally by our skilled joiners. We manufacture and

install your products from start to finish; from the initial communication, throughout the measuring and construction, until the completion of the specified job, we take pride in every step of our work.

All of our windows, doors and staircases are manufactured using high quality materials, taking into consideration environmental factors such as conservation and thermal performance.

Timber Options

Redwood - Joinery grade Softwood

is strong and moderately hard, traditionally used in manufacturing timber windows, however all new frames will have the sill made from hardwood.

Accoya - Modified Softwood

Accoya

is a modified timber using a process called acetylation. It is guaranteed for a period of

50 years against rot. This treated wood has very high durability.

Sapele - Hardwood

Sapele is widely used and characterised by its heavy strength and durability, interlocked grain and natural lustre. This beautiful hardwood is suitable for exterior joinery.

All wood is treated with wood preservative to protect against dry rot and woodworm, except Accoya which already has been treated.

High quality microporous paint is applied in the workshop using a modern spray paint technique.

We can also provide a quotation for hand painting at request.

Windows

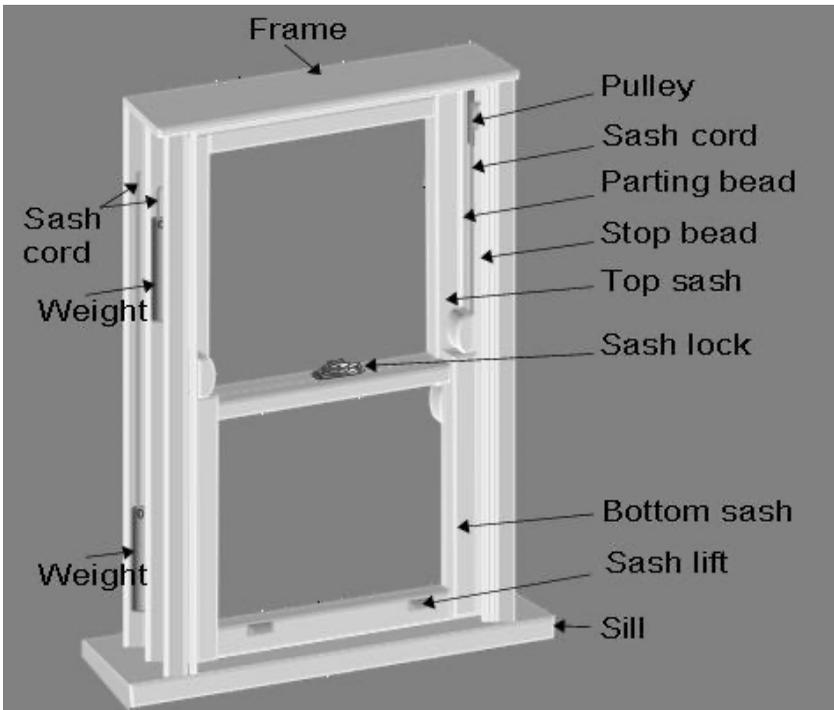

Our traditional sash windows are hand crafted and installed by qualified installers.

We are FENSA registered therefore all of our work is guaranteed and made to comply with building regulations.

Traditional Sash Windows

Sash Horns

Sash Furniture

Available in
polished brass, polished chrome and satin
chrome

Stairs

Glass

The glass you choose is highly important as it has a large role in improving thermal performance and energy costs.

Our double glazed units have a low E coating from Pilkington, Gurdian or Saint Gobain.

The units can be filled with either Argon, Krypton or Xenon gas.

We can also add extra benefits to the double glazed units such as laminated for extra security or acoustic glass for sound instillation.

We use warm edge spacers to give an optimal thermal performance.

You can choose from a range of glass including, plan, frosted to patterned, we will do our best to meet your individual taste.

Support your local business, as we are here when you need us.
